

Overview

Rectangular lamella plates

Thermobrazing

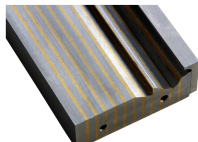

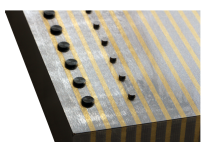

Product number 2304 100 050

Description

Our pole plates, manufactured in the special Thermo Brazing process, are mechanically extremely stable and can be cut and machined individually according to requirements!

The dimension is always given in length X width, so the length corresponds to the pole length, so if the length is greater than the width would speak in the traditional sense of a longitudinal pole pitch and if the width is greater than the length of a transverse pole pitch!

Product information

Dimension height (mm):	25
Dimension length (mm):	50
Dimension width (mm):	100
Weight (g):	1
