

## Overview

---

# DMS 2217

## plate demagnetizers

Product number 9010 2217

## Description

---

DMS plate demagnetizers are classically stable, powerful and cost-effective devices for occasional use. They are mainly used in tool and jig making. Workpieces are simply passed over the pole plates by hand. Ground parts can be collected in a non-magnetic container and guided over the pole surfaces.
