

Overview

EHG 1158

Electric Ejector magnets

Product number 4010 1158

Description

EHG electromagnetic holding rods are used in fixture construction, for gripper systems and for a wide variety of tasks in mechanical engineering. EHG holding rods consist of a screwed, two-part system, are double-coated and sealed to IP 65.

- Max. Operating temperature 60°C
- Standard voltage 24,48,110V DC
- Protection class IP 53
- ED 100%

Product information

Borehole:	3x M12
Degree of protection:	IP53
Dimension hole spacing (mm):	300
Dimension length (mm):	1000
Dimension width (mm):	150
Holding force (N):	36000
Holding force from (mm):	35
Power (W):	240
ED:	100%
