

Overview

SWR+170

Magnetic Clamping Angle

Product number 3007 170

Description

The SWR+ 170 magnetic clamping angle can be adjusted to any position in the working range between 30 and 270 ° via the lateral locking screw; the most common angles can be preset via detent positions. The powerful ND magnet system, which can be switched separately on both sides, generates 400 N holding force per leg. The prismatic base also allows round material to be clamped.

Product information

Angle:	30°-270°
Dimension length (mm):	170
Dimension width (mm):	45
Holding force (N):	400
Special feature:	lockable
Weight (kg):	2,1
