

Overview

FX-C 250

FX-C Permanent Lifting Magnets for sleeves and rings

Product number 11010257

Description

FX-C lifting magnets have a round, multi-pole clamping surface designed for lifting rings, sleeves, bearing housings, flange plates and similar workpieces, especially those with an opening in the center.

The load specification is valid for full-surface contact on workpieces with the clamping break D inside to D outside, smaller surfaces can be used with a correspondingly lower maximum load.

The round lifting magnet finds its workpiece.

Product information

Dimensions (mm):	Ø 160 H: 147
Flat material:	6mm
Product:	FX-C
Temperature (°C):	80
max. load flat (kg):	250
max. load from flat material:	12mm
