

Overview

FX-HV 200

horizontal-vertical system

Product number 1103 0202

Description

The FX-HV horizontal-vertical system is the solution when it comes to transporting horizontal workpieces vertically or also in reverse order.

The FX-HV family meets almost every need with its wide range of adjustment possibilities. The overall height and the center of gravity can be adjusted via plug-in bolts. Likewise, the unit can be used for up to 20% of its rated load without the undergripping supports. The support bolts are positioned in such a way that upright circular blanks can be attached, which is often required at the saw, for example.

Likewise, horizontal discs and sheets can be set up. For horizontal transport, the system has a crane eye on the back. The steel construction is completely powder-coated and the stable FX lifting magnet ensures maximum safety. Special dimensions are available on request.

Product information

Dimension length extended (mm):	1000
Dimension length retracted (mm):	715
Dimension width extended (mm):	400
Dimension width retracted (mm):	390
Disc Ø (mm):	250 - 750
Flat material dimensions (mm):	2000 x 750
Max. load without stop (kg):	40
Max. load with stop (kg):	200
Weight (kg):	24
