

## Overview

---

# FX-HV 2000

## horizontal-vertical system

**Product number** 1103 2002

## Description

---

The FX-HV horizontal-vertical system is the solution when it comes to transporting horizontal workpieces vertically or also in reverse order.

The FX-HV family meets almost every need with its wide range of adjustment possibilities. The overall height and the center of gravity can be adjusted via plug-in bolts. Likewise, the unit can be used for up to 20% of its rated load without the undergripping supports. The support bolts are positioned in such a way that upright circular blanks can be attached, which is often required at the saw, for example.

Likewise, horizontal discs and sheets can be set up. For horizontal transport, the system has a crane eye on the back. The steel construction is completely powder-coated and the stable FX lifting magnet ensures maximum safety. Special dimensions are available on request.

## Product information

---

<b>Dimension length extended (mm):</b>	1800
<b>Dimension length retracted (mm):</b>	1200
<b>Dimension width extended (mm):</b>	600
<b>Dimension width retracted (mm):</b>	650
<b>Disc Ø (mm):</b>	500 - 1200
<b>Flat material dimensions (mm):</b>	2500 x 1250
<b>Max. load without stop (kg):</b>	400
<b>Max. load with stop (kg):</b>	2000
<b>Weight (kg):</b>	243
