

Overview

GRM-INOX 2000

railing cleaning magnets

Product number 3004 2000

Description

The GRM-INOX railing cleaning magnets are used to clean outdoor areas, traffic areas and large industrial halls from metal parts lying around. They pick up dangerous parts such as chips, nails, screws, etc., thus protecting your employees and vehicles. They can also be permanently attached to the forklift as a permanent cleaning magnet. This way your surfaces will be cleaned continuously. The device is 100% waterproof and can also be used under water, e.g. for cleaning pool floors.

GRM-INOX magnets consist of a super strong neodymium magnet system, extremely stable built in a stainless steel housing. They are simply picked up at the fork of the forklift and guided over the floor. The length of the cleaning magnet depends on your requirements and can be freely defined for each application.

- Catch height nails 3x80mm=140mm
- Recommended floor distance in use 60mm
- Recommended speed 1m/sec

Product information

Fork spacing (mm):	650
Weight (kg):	65
Working width (mm):	2000
