

Overview

FX-HV 400

horizontal-vertical system

Product number 1103 0402

Description

The FX-HV horizontal-vertical system is the solution when it comes to transporting horizontal workpieces vertically or also in reverse order.

The FX-HV family meets almost every need with its wide range of adjustment possibilities. The overall height and the center of gravity can be adjusted via plug-in bolts. Likewise, the unit can be used for up to 20% of its rated load without the undergripping supports. The support bolts are positioned in such a way that upright circular blanks can be attached, which is often required at the saw, for example.

Likewise, horizontal discs and sheets can be set up. For horizontal transport, the system has a crane eye on the back. The steel construction is completely powder-coated and the stable FX lifting magnet ensures maximum safety. Special dimensions are available on request.

Product information

Dimension length extended (mm):	1250
Dimension length retracted (mm):	795
Dimension width extended (mm):	450
Dimension width retracted (mm):	475
Disc Ø (mm):	400 - 1000
Flat material dimensions (mm):	2000 x 1000
Max. load without stop (kg):	80
Max. load with stop (kg):	400
Weight (kg):	31
