

## Overview

---

# PMNM 1515

## Permanent Magnetic Paletts

**Product number** PMNM Permanent Magnetpalette.1

## Description

---

PMNM type permanent magnetic chucks are high precision plates for clamping small and thin parts for precision grinding and EDM. The low magnetic field height prevents magnetization of the machining tools. The clamping plate is activated by a removable hexagonal switch lever.

### Construction:

- Neodymium magnet system, steel base body,
- cross pole pitch 1.4 + 0.5 mm
- Nominal holding force approx. 100 N/cm<sup>2</sup>
- Magnetic field height approx. 5 mm
- Pole plate wear 6 mm

### Recommendation:

High-precision plate for grinding work and for eroding

## Product information
